

**Anna Tanguma-Gallegos, [anna.tanguma@asu.edu](mailto:anna.tanguma@asu.edu)**

Co-Principal Investigator of the Advanced Technological Education Resource Hub (NSF DUE# 1800615) and Research Program Manager for the Science Foundation Arizona Center for STEM at Arizona State University, providing services for Maximizing the Educational and Economic Impact of STEM.

Ms. Tanguma-Gallegos brings 10 years of STEM strategic planning and program management experience in higher education environments and initiatives. She has a history of promoting and increasing enrollment in the programs she manages, as well as developing collaborative relationships with corporate and community members. Anna has provided successful direction to federally funded programs within the higher education field. Ms. Tanguma-Gallegos spearheaded the relationship with Health Pathways Grossmont-Cuyamaca Community College District, and University of California-San Diego Moore's Cancer Center to develop their first-ever nursing internship summer program and offering a value-added learning experience for the students.

Ms. Tanguma-Gallegos is working with Hispanic Serving Institutions (HSIs) as part of the National Science Foundation (NSF)-funded KickStarter Program. The goal of KickStarter is to enhance the enrollment of Latino students in STEM fields by helping colleges with their STEM planning and maximizing the competitiveness of their federal grant proposals to fund those plans.

Ms. Tanguma-Gallegos is a Ph.D. candidate from Grand Canyon University, AZ. She brings a unique skillset to this position with Bachelor's and Master's degrees in Behavioral Science/Educational Counseling from National University, CA.
